

ASSESSMENT AND INTERNAL VERIFICATION FRONT SHEET (Individual Criteria)

(Note: This version is to be used for an assignment brief issued to students via Classter)

Course Title	CA-IDM-5.2 and CA-ANI-5.1			Lecturer Name & Surname	Alistair Attard	
Unit Number & Title		CAIDM-506-2205 Sound and Image				
Assignment Number, Title / Type		Sound Design for Creative Visual Products				
Date Set		12/02/2025	Deadline Date	27/05/2026		
Student Name			ID Number		Class / Group	

Assessment Criteria	Maximum Mark
1.1 Collect examples of sound and image projects	10
1.2 Identify effective use of sound in creative visual products	10
2.1 Outline different methods for sound recording and production	10
2.2 Devise sound assets for a creative visual product	10
3.1 Select appropriate methods for sound production	10
3.2 Produce sound assets for creative visual product following industry standards	10
3.3 Experiment with various methods of sound asset production	10
4.1 Apply sound assets to a creative visual product following industry standards	10
4.2 Present sound and image project creatively	10
4.3 Evaluate use of sound in a creative visual project	10
Total Mark	100

Notes to Students:

- This assignment brief has been approved and released by the Internal Verifier through Classter.
- Assessment marks and feedback by the lecturer will be available online via Classter (<http://mcast.classter.com>) following release by the Internal Verifier
- Students submitting their assignment on Moodle/Turnitin will be requested to confirm online the following statements:
 - Student's declaration prior to handing-in of assignment**
 - ❖ I certify that the work submitted for this assignment is my own and that I have read and understood the respective Plagiarism Policy
 - Student's declaration on assessment special arrangements**
 - ❖ I certify that adequate support was given to me during the assignment through the Institute and/or the Inclusive Education Unit.
 - ❖ I declare that I refused the special support offered by the Institute.

Purpose and Aims

Sound is an essential component of multimedia design and visual projects as it introduces a multisensory approach as well as adds mood, tone and strengthens the project narrative. The aim of this unit is to help learners gain knowledge on the basics of sound and later plan and apply sound to a visual product using sound editing software. Learners will be introduced to sound in visual projects and gain an understanding of its use.

Learners will be encouraged to learn how to make appropriate and effective use of sound and later experiment further by using unconventional methods of sound recording and application. Although learners should ideally be given a set brief, this should be open enough for learners to select a visual medium of their choice. Possible projects could comprise of: sound design for a game, animation or animated infographic, interactive design project, web content and digital art projects. Although learners can choose to go for films and music videos, they must find a graphic design or interactive media context for such a project.

By the end of this Unit, learners will gain an additional skill that will help them in the way they approach multimedia work. Through a creative approach, this Unit also aims to introduce new possible combinations of sound and image that learners would not have otherwise considered.

Scenario

In this unit learners will **produce a 1min audio-visual production** through the use of industry relevant audio and moving image software. **Original sound design** should be **fully synced** to an **original moving image production** in order to produce the whole project. A brainstorming process should be conducted in order to create innovative concepts for the final production.

On completion of this unit the learner will be able to:

LO1 Identify effective use of sound in creative visual products

LO2 Devise sound assets for a creative visual product

LO3 Produce sound assets for creative visual product following industry standards

LO4 Apply sound assets to a creative visual product following industry standards

Task 1

LO1 Identify effective use of sound in creative visual products

1.1 Collect examples of sound and image projects

1.2 Identify effective use of sound in creative visual products

- Analyse **2 different audio-visual projects**, and **identify the main sound elements and techniques** that make up each project. Research should be used to help identify the original concepts behind the genre/style.
- **Embed your descriptors as subtitles**. These should be perfectly **in sync with the visuals** using video editing software such as Adobe Premiere, DaVinci Resolve, Final Cut Pro etc.
- Feel free to describe your embedded descriptors in further detail during the presentation.
- **Each chosen production** should have a **minimum duration of 1 min**.

You are encouraged to analyse and discuss each chosen production in order to come up with the best possible analysis.

Submission: *Powerpoint presentation in .pdf format and visuals in .mov format.*

Deadline: *Wednesday, 25th March 2026*

Grading Criteria: *KU1.1, KU1.2*

Task 2

LO2 Devise sound assets for a creative visual product

2.1 Outline different methods for sound recording and production

2.2 Devise sound assets for a creative visual product

Here the student is expected to research and generate ideas how to use sound effectively for the upcoming moving image project.

Lectures will help the learner acquire the information needed to use the equipment and the software available. However, further research will make the production process easier as the learner will have a better idea of the equipment and software in current use.

- **Research and generate ideas** how to use sound in your production using the correct terminology and referring to current practices in the industry. You can illustrate this in any way you like.
- **Develop a detailed sound design map** for your final audio-visual project. This can be presented in the form of an excel sheet or a table.

Submission: .pdf file

Deadline: Wednesday, 8th April 2026

Grading Criteria: KU2.1, AA2.2

Task 3

LO3 Produce sound assets for creative visual product following industry standards

3.1 Select appropriate methods for sound production

3.2 Produce sound assets for creative visual product following industry standards

- **Record 20 sounds** to start off the production process for your final project. While recording these sounds you should always keep the respective theme of your project in mind, as this will surely influence the final mood and style of your project. (AA2) Learners are encouraged to make use of professional pocket recorders and microphones to record these sounds.

These sounds will be combined together to produce the sound design production. Along with these original recorded sounds, learners can make use of any other royalty-free sounds/samples in combination. Any sounds/samples can be used, as long as they fall within the context of the original concept in mind.

Learners are encouraged to manipulate these sounds in creative and original ways using the available software (Fairlight in DaVinci Resolve). New sounds should also be produced from original raw sounds/samples. The lecturer will explain such processes during class hours, however, learners are expected to research and practice new ways of manipulating sounds in order to come up with their own original material.

Submission: .wav

Deadline: Wednesday, 29th April 2026

Grading Criteria: AA3.1, AA3.2

Task 4

LO4 Apply sound assets to a creative visual product following industry standards

3.3 Experiment with various methods of sound asset production

4.1 Apply sound assets to a creative visual product following industry standards

4.2 Present sound and image project creatively

4.3 Evaluate use of sound in a creative visual project

- **Finalise and export the audio-visual project (c. 1min)** within the highest possible quality standards. (*Integrated Loudness – 23LUFS, -1dBFS True Peak, Sampling Rate 48kHz, Bit Depth – 24bit*)
- **Design appropriate packaging and cover designs** according to the theme of your audio-visual project.
- **Present a documentation booklet** with an overview of the whole production process.
- **Evaluate** your production by producing a **presentation**. The final production has to be previewed during the presentation.

Submission: .pdf and .mov

Deadline: Wednesday, 27th May 2026

Grading Criteria: AA3.3, AA4.1, SE4.2, SE 4.3

Minimum Evidence List

1	Presentation – Task 1	☐
2	Sound Map – Task 2	☐
3	Sound Recordings – Task 3	☐
4	Finalised Audio/Visual Project – Task 4	☐
5	Cover Design – Task 4	☐
6	Documentation – Task 4	☐
7	Evaluation – Task 4	☐

Print this page and hand in with your assignment on final hand in date.
